

WELCOME TO IGNATIUS FARM COMMUNITY SHARED AGRICULTURE

Ignatius Farm - A core part of the Ignatius Jesuit Centre since its beginnings in 1913. Though the land was initially purposed with supporting the formation of Jesuit priests, Ignatius Farm has evolved to address the ecological and agricultural challenges of our times. It now operates as a community-oriented, certified organic training farm. The vegetable operation supplies produce to farmers markets, restaurants and health food stores, service agencies and the Farm's key supporters - CSA members.

About Ignatius Farm CSA

Established in 2001, Ignatius Farm provides Small and Regular CSA shares to over 200 households in Guelph and the surrounding area. A prepackaged option is available, where your share is packed by the farm staff for a fee. Neighbourhood CSA host sites around Guelph offer pick up location for pre-packed shares. In a lean growing season, CSA members are prioritized since they have prepaid for their portion of the harvest. Regular CSA shares (typically feed two vegetarians or a family of four) average \$47 in weekly value. Small CSA shares (a bit over half of a regular share) average \$30 of organic produce in weekly value. An extra week's worth of harvest is included in the Late Summer Share.

Here is the **certified organic** produce expected throughout the season

Early Summer	Strawberries, spinach, salad greens, radishes, peas, broccoli ...
Mid-Summer	Tomatoes, peppers, eggplants, beans, broccoli, beets, carrots, cucumbers ...
Late Summer	Potatoes, garlic, onions, beets, carrots, parsnips, leeks, spinach, pumpkin ...
Winter (bi-weekly)	Beets, potatoes, garlic, onions, carrots, leeks, winter squash, rutabaga ...

The lead farmer (Assistant Farm Manager) is Donald Bowyer. Heather Lekx, our inaugural CSA Farmer, is the Farm Manager. Each year the farmers are assisted by countless volunteers, Workshares, several energetic interns learning about organic farming, and 4-10 seasonal staff as funding permits
